RNLI Water Safety

Below are some links to a range of resources that could help you educate your child about water safety.

What are the dangers for children at the beach?

Without you by their side, children are vulnerable at the beach. They need you to protect them from the sea's unpredictable waves, rip currents and cold water.

What do you need to avoid?

Don't use inflatables - they get swept out to sea, with you or your child on them. And watch out for rip currents. Every beach is different, so make a point of reading any safety signs.

What if you do get into danger?

If you have your mobile phone, call 999 and ask for the Coastguard, and they will send help. Leave difficult rescues to the lifesavers. If there are lifeguards nearby, alert them. If you or your children are struggling in the water, remember: FLOAT TO LIVE.

Autumn Menu is attached. We return on Week 1.

With kind regards
