Design Technology

Our intent:

- We want our children to develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world.
- We want our children to build and be able to apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users.
- We want our children to critique, evaluate and test their ideas and products and the work of others.
- We want our children to understand and apply the principles of nutrition and learn how to cook.
